To whom it may concern,

I am a subscriber to XM satellite radio and have just learned about the "NAB petition that seeks to stop XM from providing XM Instant Traffic & weather." I listen to these channels regularly because I can get the Traffic and weather whenever I need them, not whenever it is convenient for the radio station to convey the information (as in am and fm radio stations). This is a high quality service that I pay for each month and it is worth every penny. You would be doing an extreme disservice to all customers if you even consider listening to the NAP's petition.

Thank you,

Michael Gourlay
